

- 2 Find the physical address of memory location **2F3A:7B1Ch**.
- 2 A memory location has physical address **9C2E5h**. Compute the offset if the segment number is **4A00h**.
- 2 Compute the segment if the physical address is **1B8F2h** and the offset is **0E2Bh**.
- 2 Find the physical address of memory location **0A12:FFF0h**.
- 2 A memory location has physical address **3D4A0h**. Compute the offset if the segment number is **2F00h**.
- 2 Compute the segment if the physical address is **7F123h** and the offset is **8123h**.
- 2 Find the physical address of memory location **FFFF:0001h**.
- 2 A memory location has physical address **24680h**. Compute the offset if the segment number is **1870h**.
- 2 Compute the segment if the physical address is **ABCDEh** and the offset is **2345h**.
- 2 Find the physical address of memory location **4000:8000h**.
